

Dudarev Vladimir Ivanovich

October 6, 1951 year of birth

IRNITU Department of Chemistry and Food Technology named after Prof.V.V.Tuturina

Academic disciplines: General and inorganic chemistry, Analytical chemistry.

Doctor of Technical Sciences with 2002 г

Scientific specialty 05.17.07 – Chemistry and technology of fuels and special products

Professor of the Higher Attestation Commission with 2007 г

Total number of publications – 295

of monographs – 6

Number of scientific inventions and patents – 12

He was awarded the Certificate of Merit of the Ministry of Education of the Russian Federation.

Honorary Worker of Higher Professional Education of the Russian Federation.

Area of scientific interests – Chemistry and technology of new materials based on carbon-containing products. Scientific direction "Synthesis, research and application of new types of carbon materials with special chemical and physical properties" In the system of postgraduate training of highly qualified specialists participates in the training of full-time and part-time postgraduate students in the areas 05.17.07 -Chemical technology of fuels and special products and 02.00.01 - Inorganic chemistry. Under the guidance of V.I. Dudarev, 5 Ph.D. theses on technical sciences were successfully defended.
