

## DIRECTION ARCHITECTURE (ARB)

Profile: architectural design.

Architecture – is a field of human activity that has always been and will be in demand everywhere and always, is one of the most prestigious specialties in the whole world, because architects have unique qualities - to combine intuition and engineering calculations, scientific knowledge and creative inspiration of an artist. Architecture forms the space for life and all types of human activities. Graduates have the skills to research and design buildings, structures, complexes, recreational landscapes and life support systems. Participate in the creation of master plans for cities and towns, the reconstruction of historical buildings.

Our graduates are in demand. The graduate receives a wide range of employment opportunities: administration in the architectural and design field at the local and regional levels, management of the activities of architectural workshops and design bureaus, execution of project orders for private clients.

The development of the educational program is provided by the teaching staff of highly qualified specialists with many years of teaching experience and practicing architects who combine the main activity and the transfer of experience to students.
