

Born in 1957 in Irkutsk. In 1979 he graduated from the Geological Exploration Faculty of the Irkutsk Polytechnic Institute with a degree in mining engineer-hydrogeologist. After an internship at the Leningrad Mining Institute, he began working in the Branch Research Laboratory of the Ministry of Geology of the Russian Federation, where he studied hydrogeological and engineering-geological conditions of iron ore deposits in the Irkutsk region. Since 1987, he has been teaching at the IPI (IrSTU, IRNTU) at the Department of Hydrogeology and Engineering Geology. My research interests are related to engineering and geological surveys for the construction of civil and industrial buildings and structures. Participated in the study of geological conditions of the route of the construction of the Eastern Siberia - Pacific Ocean oil pipeline, surveys for the reconstruction of the Severomuisk tunnel BAM, architectural monuments of the Irkutsk region and other facilities.
